YOUR GLOBAL PARTNER IN SIGNAGE

Cosign was established in 1993. Over the last 30 years it has become the unsurpassed reference with regard to architectural signage.

No matter what type of signs you need, for indoor or outdoor use, flexible or modular, with or without LED technology, if desired with fabric, advertising pillars or spacers, Cosign is the right address.

Cosign is a global player with production facilities and distribution centres in Belgium (headquarter), India, Mexico and Brazil

Our extensive range of products is unique. We are able to deliver quickly due to our large supply of stock. 30 years of experience, well-organised logistical transactions and perfect service. Cosign is a reliable partner that you can trust.

MODULE PLUS INDOOR

www.cosign.in/moduleplusindoor

A CLASSIC PRODUCT THAT CONTINUES TO DO THE JOB PERFECTLY!

With the Module Plus Indoor, Cosign developed a modular sign system at the beginning of the 1990s that started a new trend within architectural signage and served as an inspiration for many people working in the same industry.

The Module Plus Indoor consists of a series of flat aluminium profiles in different widths that has a15.5 mm and 31 mm module as the basic profile. The profiles can be "clicked" into place in an easy manner on plastic end caps or clips to create door signs, pictograms, directories, etc. Single-sided signs for wall mounting and double-sided systems for hanging or flag mounting are possible.

The Module Plus Indoor platform does not just offer the sign maker a simple, versatile and flexible standard solution, it also offers space to the creative sign maker to place his or her own emphasis and to develop customised products.

STRATO

www.cosign.in/strato

STRATO is a flexible and contemporary sign system consisting of series of soft curved profile with a straight edge.

A paper inlay (in the most common DIN formats) can be inserted in the profile behind a non-reflecting cover. Insert in plastic or metal are of course also possible as well as direct printing on the profiles.

The user can choose between plastic and aluminium and caps for the finish. Recently, a few profiles and end caps were added to the range that ensure that 400 mm, 500 mm and 600 mm wide directories can be produced.

I-SIGN FIX

Conference Room
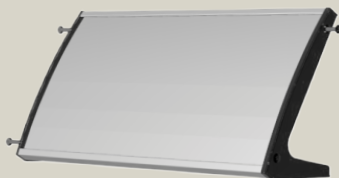

www.cosign.in/isignfix

The sleek design of the I-sign range is extended to the I-Sign Fix; observe the elegant frame with invisible fixings.

Sheets of only 2 or 3 mm thick are mounted in the frame with a small, innovative clip. The sheets can be made from various materials: PVC, ACP, acrylic, aluminium, engraving materials, etc. This results in a high degree of personalisation.

I-SIGN DISPLAY

www.cosign.in/isigndisplay

The single-sided I-Sign Display profiles make it possible to make framed large panels, digital prints and art virtually without an edge and without visible fixings. This makes them very suitable for use in museums, galleries and interior decoration.

The double-siged slim 24mm profile is a perfect option for making non lit suspended & projected signs

The double-sided 50mm profile is a perfect option for making thin light boxes and illuminated or non-illuminated indoor pillars.

The double-sided 100 mm profile is designed to build totems upto 4 m & lit light boxes.

Double-sided tape, magnetic tape or the 3M dual Lock' reclosable fastener can be used to affix the panels.

LIGHT BOX

www.cosign.in/lightbox
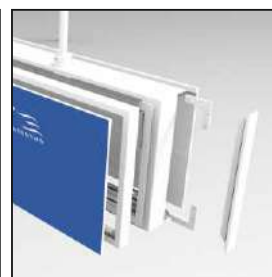

Cosign developed an elegant indoor lightbox with a depth of only 75mm (single-sided) or 100mm (double-sided).

The hinging frame on top makes maintenance and a quick change of the acrylic panels and/or graphics extremely easy.

the hinging frame comes in 2 versions. One has the typical caps look with the thin edge. the other one has an edge of 12.5mm which allows for the acrylic panels to be fully illuminated.

The perfect lightbox for airports, metro station, garages, etc.

FABRIC FRAME

www.cosign.in/fabricframe

COSIGN FABRIC FRAMES: INFINITE POSSIBILITIES

Fabric frames are the solution for the fast and easy exchange of printed textile fabric. The image is printed on a textile fabric and a silicon beading is added around it. This is simply pressed into the profile that ensures that the slightly stretchable fabric can be stretched perfectly.

The convenience of use of our aluminium profile in combination with innovative accessories and high-quality textile fabrics that can be printed up to 5 m wide seamlessly means that our fabric frames are perfectly suitable for dressing and setting up shops, showrooms, offices and fair stands. Regardless of whether you want a wall frame or a standalone or hanging frame, you will find the right solution with our single-sided and double-sided fabric profile.

OPTI FRAME
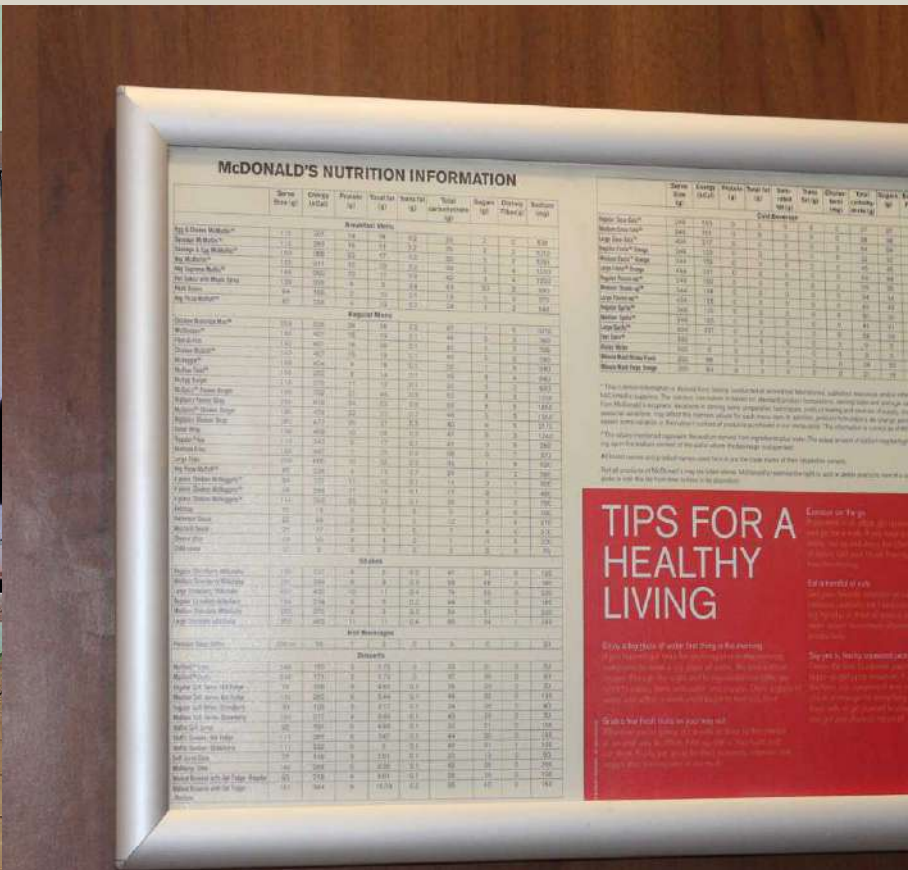

www.cosign.in/optiframe

With our new product, we aim to bring a new dimension of performance to retail display frames.

Our R&D team has focused their extensive knowledge on transforming production processes to create a completely new type of front opening display frame.

Opti-Frame not only delivers multi functional applications with a variety of mounting options, but is specially engineered to offer very competitive rates in snap frame market.

ART FRAME

www.cosign.in/artframes

The Cosign art frames are a popular solution for installation of painted or printed canvas. Made of aluminium these frames are light weight. Metallic and wooden finishes in shapes compliment all kinds of architectural environments.

The canvas can be easily replaced. There is enough space to include a glass cover to protect the canvas. Perfectly suitable for shops, showrooms, offices, hotels, malls and even homes.

LED THINLITE

www.cosign.in/ledthinlite

LED Thinlites are elegant, silver anodised poster frames with integrated LED Light Sheets. The thin LED frames have hidden leaf springs.

LED Thinlites can be supplied in both single- and double-sided versions in various standard sizes. Custom-made versions (with regard to dimensions, colours, indoor/outdoor use, with or without a switch, etc.) can also be supplied. Cosign can also supply the aluminium profile and accessories to assemble your LED Thinlites yourself.

ILLUMINATED EXIT SIGNS

www.cosign.in/artframes

Fire Exit Signs are a critical part of the emergency exit strategy. An effective fire exit safety plan needs to be prepared for all premises.

With our new product range we bring a solution with 3 hours battery backup. Three elegant models which can well mounted, ceiling suspended, ceiling recessed or projected.

All models carry out self testing and indicate failure through a led. A button is also provided for physical testing.

MODULE PLUS OUTDOOR

www.cosign.in/moduleplusoutdoor

STYLISH MODULAR OUTDOOR SIGNS

With Module Plus Outdoor, Cosign has developed a modular system for outdoor signs that is recommended by architects and designers worldwide and that sign makers like to use because of its versatility and convenience and the option of making unique custom-made signs.

Module Plus Outdoor offers the perfect solution everywhere where a building or location needs to be indicated, a message must be presented or people must be shown the correct place regardless of whether this is for an industrial estate, a company or office building, a hospital, a school, a shopping centre or a car park. Appropriate outdoor signs will also contribute towards strengthening a company's corporate identity.

TOTEM PYLON

Everyone is familiar with Cosign 'Classic' totem profiles, which are used to make illuminated or non-illuminated elegant, curved or elliptical advertising pillars.

Depending on the application, location and desired size, the sign maker can choose our totem pylon 50 mm of totem 80 mm for smaller totems (up to 3 meters) or our totem pylon 137 mm and the more recent H-profile for larger totems (up to 6 meters).

MODULAR TOTEM

www.cosign.in/modulartotem

MODULAR TOTEM is an extremely intelligent profile system that consists of one basic profile and three decorative cover profiles (rectangular, elliptical and rounded) that are mounted on a frame.

The system allows you to determine the depth (10, 15 or 20 cm), material (aluminium or steel), size and wall thickness of the interior structure of the totem. This makes it possible to construct strong totems of up to 6 meters high.

The profiles and panels are attached with hidden screws. The totems are easy to maintain and update because the panels can be lifted out and inserted effortlessly.
